Re: 099-15148
First Administrative Amendment to
Part 70 099-5288-00044

Dear Mr. Bembenick:

Dura-Vent Industrial Division was issued a Part 70 permit on March 31, 1998 for a stationary flexible hose manufacturing source. A letter requesting a change in the permit was received on December 14, 2001, with additional information received on January 29, 2002. No Hydrogen Chloride (HCl) emissions will result from the operation of the new equipment not unless the heated vinyl is under fire or char conditions. Therefore, it qualifies as a "revision to descriptive information where the revision will not trigger a new applicable requirements or violate a permit term", under 326 IAC 2-7-11(8). The administrative amendment is as follows:

- (a) One (1) 220 volts single phase 40 ampere (amp) electric vinyl heat sealing system.

Section A.3, Insignificant Activities will remain the same since this section only listed equipment with applicable requirement.

All conditions of the permit shall remain unchanged and in effect. Please attach a copy of this amendment to the front of the original permit.

This decision is subject to the Indiana Administrative Orders and Procedures Act - IC 4-21.5-3-5. If you have any questions on this matter, please contact Aida De Guzman, at (800) 451-6027, press 0 and ask for Aida De Guzman or extension (3-4972), or dial (317) 233-4972.

Sincerely,

Original signed by Paul Dubenetzky
